

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24683

Stream : St. Joseph River

Applicant : Board of Elkhart County Commissioners
John E Bowers PE, Engineering Supervisor
610 Steury Avenue
Goshen, IN 46528-3011

Description : The existing bridge will be rehabilitated by removing and replacing the existing concrete deck, sidewalks, approach slabs, and bridge railing. The existing concrete deck and sidewalk will be removed and replaced with a similar concrete deck and sidewalk. New deck drains will be installed before pouring new concrete. All steel expansion bearings at both abutments will be removed and new semi-integral end bents will be constructed. New full width concrete approach slabs will be constructed. The mainline and shoulder approaches will be milled and resurfaced approximately 100' in each direction. Proposed approaches will match the width of the existing roadway. The proposed concrete bridge railing will match the existing railing. New bridge lighting will be attached to the bridge railing. Details of the project are contained in information and plans received at the Division of Water on January 25, 2008.

Location : At the Bridge Street stream crossing
near Elkhart, Elkhart Township, Elkhart County
NE¼, SW¼, NE¼, Section 7, T 37N, R 5E, Elkhart Quadrangle
Quad Code: 4108568
UTM Coordinates: Downstream 4614407 North, 584026 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24689

Stream : Charley Creek

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The superstructure of the existing 3-span bridge carrying (Cass Street) over Charley Creek will be replaced and widened. The existing end bent caps and concrete slope wall will be replaced and widened on the upstream side only. The existing piers will be widened on the upstream side as well. The overall structure width will increase 8' from 44' to 52'. The approach grade will not be adjusted significantly. A temporary sandbag barrier will be used in order to perform the construction on the piers (one side at a time). Details of the project are contained in information and plans received at the Division of Water on January 29, 2008.

Location : At the crossing of SR 15 over Charley Creek.
DOWNSTREAM: near Wabash, Noble Township, Wabash County
T 27N, R 6E, Wife and Children of Charley, Wabash Quadrangle
Quad Code: 4008577
UTM Coordinates: Downstream 4517885 North, 598752 East
UPSTREAM: Wabash County

UTM Coordinates: Upstream 4517894 North, 598762 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24690

Stream : South Fork Smalls Creek

Applicant : Town of Bruceville
Everett Dillion
PO Box 247
Bruceville, IN 47516-0247

Description : An outfall structure will be constructed along the right (east) bank of the creek in association with a proposed wastewater treatment plant, located landward of the floodway. In addition, an 8" diameter PVC effluent gravity sewer pipe will be installed approximately 5' below existing grade from the plant to the outfall structure. The sewer pipe will terminate with reinforced concrete retaining walls and an 8" heavy duty back flapgate will be placed on the end of the pipe to prevent backflow. Riprap will be placed at the outfall structure for erosion controls measures. Details of the project are contained in information and plans received at the Division of Water on January 29, 2008.

Location : Located at the upstream side of the South 25 East Road stream crossing near Bruceville, Washington Township, Knox County
T 4N, R 9W, Vincennes Tract #73, Fritchton Quadrangle
Quad Code: 3808764
UTM Coordinates: Downstream 4288332 North, 462780 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

- Application # : FW-24691
- Stream : Big Raccoon Creek
- Applicant : Mike Roe
7975 East Chandler Avenue
Terre Haute, IN 47803-7700
- Description : The project involves the clearing of logjams, dirt, debris, brush, and fallen trees within an approximately 650' reach of the creek to restore normal flow patterns. Work will be done using a farm tractor. In addition, the cement mill dam will be repaired by filling holes with cement. Details of the project are contained in information and plans received at the Division of Water on January 30, 2008.
- Location : Beginning approximately 450' downstream of the County Road 320 East creek crossing and continuing upstream approximately 650'
DOWNSTREAM: at Bridgeton, Raccoon Township, Parke County

30 Day Public Notice Report

Application # : FW-24704

Stream : Pigeon Creek

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : Two pairs of twin bridges will be constructed over Pigeon Creek and a tributary to Pigeon Creek to carry the new I-69 roadway over the two channels and a portion of the Pigeon Creek floodplain. One pair of 13-span twin bridges will consist of 1300 foot long, continuous composite prestressed concrete or steel beam bridges. This pair of twin bridges will span the Pigeon Creek Channel and a portion of the floodplain that is north of Pigeon Creek. Each bridge will have an out-to-out bridge width of 44.33 feet and a clear roadway width of 41.33 feet. The spill through abutments will have 2:1 sideslopes armored with limestone riprap placed over a geotextile fabric. The abutments and piers will be skewed 0 degrees to align with streamflow. The second pair of 2-span twin bridges will consist of 200 foot long, continuous composite concrete bulb-tee or steel beam bridges. This pair of twin bridges will span the Tributary to Pigeon Creek and a portion of the Pigeon Creek floodplain that is between Pigeon Creek and the Tributary. Each bridge will have an out-to-out bridge width of 45.17 feet and a clear roadway width of 42.17 feet. The spill through abutments will have 2:1 sideslopes armored with limestone riprap placed over geotextile fabric. The abutments and piers will be skewed 35 degrees to the left to align with streamflow. The approach roads will be elevated a maximum of approximately 21 feet above the existing grade. Best management practices will be implemented where needed. Details of the project are contained in information and plans received at the Division of Water on February 5, 2008.

Location : 13-span bridge, beginning approximately 215' south and 210' east of County Road 550 East crossing over Pigeon Creek and extending 1305' north and 160' east; 2-span bridge, extending approximately 185' to 385' downstream from County Road 550 East crossing over the Unnamed Tributary to Pigeon Creek and extending out approximately 100' on both banks
DOWNSTREAM: near Buckskin, Barton Township, Gibson County

30 Day Public Notice Report

Application # : FW-24708

Stream : West Fork White Lick Creek

Applicant : Melissa C Burnworth
PO Box 65
Danville, IN 46122-0065

Description : A 24' by 36' one-story residential accessory structure (garage) is to be constructed within 50' of the east bank of West Fork White Lick Creek. The lowest floor will be 4" above the surrounding grade. The structure will be floodproofed to an elevation of 797.5'. Flood vents will be installed as required by FEMA regulations. The accessory structure will be used for the storage of vehicles. Details of the project are contained in information received electronically at the Division of Water on February 8, 2008 and in plans and information received at the Division of Water on

Location : Approximately 3510' south of the intersection of County Road 200 South and Cartersburg Road
near Danville, Center Township, Hendricks County

30 Day Public Notice Report

Application # : PL-20953

Lake : Sechrist Lake

Applicant : Rod Yoder
2237 South Clover Lane
Warsaw, IN 46580-6418

Description : An existing concrete seawall will be refaced across a portion of the 46' frontage of the applicant on Sechrist Lake to prevent deterioration. The refacing will consist of reinforced, poured in place concrete which will be tied to the existing wall with steel reinforcing rods. The refacing will have a maximum thickness of 12" and will be sloped on the lakeward side. A 24" wide concrete walkway will be constructed on top and landward of the lakeward face of the refaced wall. The existing concrete seawall has a existing concrete boat ramp that will be removed and the concrete reface will continue over the old boat ramp. Details of the project are contained in information received electronically at the Division of Water on February 13, 2008 and in plans and information received at the Division of Water on

Location : 141 EMS B43 Lane; located on the north end of Sechrist Lake
near North Webster, Tippecanoe Township, Kosciusko County

Statute/Rule : Lakes Preservation Act, IC 14-26-2, with the associated Public Freshwater Lake Rule, 312 IAC 11
